

## **Counter Intelligence - Awake**

Counter Intelligence are one of the most extraordinary bands in the Indie World.

These guys run in the dark and understand tripping into the abyss and therefore, own progressive insight into true light. The Band is able to combine these Worlds in both song writing and delivery. Counterintelligence presents a song that twines in the current Covid status, yet, I always feel the undertone of dark loveliness, causing a chakra ache.

Up top, they dish real music, highly skilled instrumentation, unembellished by extra instruments or synth that could cause distortion and/or detraction from hearing the lyrics and toking the hypnotic melody and arrangement.

The instrument variation offers pleasing and subtle eccentricities. In this song there is a brief run of what sounds like Spanish Guitar and a bit further in, the beginning of, 'Mod Squad.'

These guys rather specialize and are supreme in vocal harmony and this enriches the register throughout.

The vocal tones are transcendent and interface so well with the theme and Music. I love being able to easily understand the Lyrics, remaining wide open to the song's intricate components. Incredible.

Mary xxxx
