The best way to start your day? That is easy, with some of 'The L-O-V-E' from the honey dripped vocals chords of Angel Sessions.

From the moment this laconic, easy groove begins you feel relaxed, like you've being given a beautiful, warm musical bubble bath, with lush harmonies swimming all around you. Reminiscent of the legendary Anita Baker, and the stunning Laila Hathaway, Angel captures all the cool, chilled warmth of these great artists.

The only problem is, I do not want to do anything else today, but sit in the sun, drink iced tea and listen to this gorgeous silky voice wrapped in sugar coated harmonies.

Dive in and get some, but best write the day off, because Angel will make you kick back, take it easy... Beautiful!
