

## **The Incurables - Back Into Eloise**

So much 'Power and Punk' pulled from their influences and packed into this track from the Incurables – Back into Eloise.

From the start, with the reverse gate intro, you think the track is going one way but suck you right into that old school pop punk track with the clean guitar sound and minimal effects, just raw and in your face.

Like early Elvis Costello and others. Great sound, the guitar, drums, bass, and vocals are spot on and the perfect mix for the tune. Love the guitar solo, one you can sing along with then goes into a super cool Tango break down with an amazing guitar solo, then back into the song.

Love the rawness of the vocals and the passion coming from his voice along with the harmonies of the backup. Quick little tune that you will want to play repeatedly at 3:37 seconds.
