Alternative rock meets the Clash, and Sex Pistols!

"Follow You," by the SilverVoodoos boasts great vocals and the lyrics have a style of their own, especially obvious if you pay attention to the message.

I can also hear Black Sabbath and Led Zeppelin influences, as well.

"Follow You," has a very catchy rhythm. The bass and drums make the driving force behind the British guitar fuzz effects. This reminds me of an early, "headbangers," mosh pit as well.

The lead guitar has a classic sound, with this band's own flair to it.

Overall, I give this track a 9/10 rating, either mixing, or production sound is a bit soft unless they wanted the old 45 vinyl sound, then it makes sense.
