I loved this band the moment I saw the name Brittle Sun. This groups evocative, thought-provoking name is echoed within their newest song "Paquita".

Brittle Sun also tells the story of a romance, of a beautiful soul, who is taken advantage of. When she is gone, the tormentor would do anything to see and hear them again.

The beautiful jangling guitars are joined by evocative half-time drums that making it impossible to not move along with them.

Then, we have Viki Mealing's voice, which is angelic, haunting and evokes visceral pathos, making the listener desperate for the return of this beautiful, lost soul.

The video that accompanies this sublime song is like a lovely, psychedelic dream.

Turn the phone silent, sit back, relax, and let Brittle Sun take you on a journey that will stimulate all of your senses, gorgeous!
